**Subject:** FW: DI-2 well TDS in formation water  
**Attachments:** DI-2, Formation TDS levels.xlsx; Dakota TDS levels in wells near DI-2.jpg

Here is a map of the wells near DI-2 that had a water sample tested for TDS from the Dakota Group (also listed in the XL file).

The wells are located in the center of the section they are listed in by the Colorado Oil and Gas Conservation Commission.

The numbers at each site are the TDS in mg/l. One well (ID 150010) has two TDS listed-- one in the J sand and one in the D sand in the Dakota.

The TDS listed for the DI-2 well is the average of the 6 Dakota water samples from the nearby wells shown.
